

We are fully committed to work alongside our partners, customers, and suppliers during this pandemic in line with the government guidelines.

Our staff have received additional training and we have put the additional measures in place:

- 1 – Hand sanitizers on all vehicles.
- 2 – Face Masks on all vehicles.
- 3 – Regular cleaning internally and externally of all vehicles.
- 4 – Antibacterial sprays used when to clean down the services after every installation.
- 5 – Social distancing measure both on-site and within our works.

Risk assessments have been issued to all of our employees in line with the government guidelines and are being adhered to.

Our trade counter is open and operating on a call and collect service only as we have limited the number of customers through our doors. All other services are operational.
